PROFILE

Game Programmer and Web Developer with professional Unity (C#) experience at two game studios and a full-stack web background using Next.js, Vue.js, Laravel, and TypeScript. Skilled in gameplay programming, including real-time webcam face detection with MediaPipe, and in building web applications from interface to database. Informatics Engineering student at Primakara University (GPA 3.95/4.00).

SKILLS

- Game Development:** Unity, C#, Gameplay Programming, Game Logic, MediaPipe, Lighting Setup
- Web Development:** HTML, CSS, JavaScript, TypeScript, PHP, Next.js, Vue.js, Laravel, Tailwind CSS, Bootstrap
- Backend & Database:** MySQL, Supabase, Prisma
- Machine Learning:** Python, Data Processing, Machine Learning Fundamentals
- Tools:** Git, GitHub, Vercel, Netlify
- Languages:** Indonesian (Native), English (Limited Working)

WORK EXPERIENCE

Palm Game Studio Denpasar
Game Programmer Aug 2025 – Present

- Developed core gameplay mechanics for a client-commissioned horror game in the survival-horror style of Five Nights at Freddy's 2, built with image and video assets.
- Implemented real-time player face detection from webcam input using MediaPipe as a gameplay mechanic.
- Contributed to competition game entries Midnight Toys (Gamersia 2025) and Paw Tennis (GameSeed 2026).

Socks.Studio Denpasar, Bali
Junior Game Programmer Dec 2025 – May 2026

- Developed and implemented core gameplay mechanics and game logic for a responsive player experience.
- Configured lighting systems in Unity to achieve the desired visual atmosphere.
- Translated design concepts into functional C# code, contributing to game polishing.

Asah led by Dicoding Bali, Indonesia
Machine Learning Trainee Aug 2025 – Jan 2026

- Completed a 6-month program covering machine learning techniques, data processing with Python, and AI algorithm applications.

Bamboomedia East Denpasar, Bali
Web Developer Dec 2021 – Feb 2022

- Built an e-commerce website for book sales.
- Compiled short TV news stories into the company's in-house application.
